

ESUBALEW KUNTA AWASH | Software Engineer

+251966042929 | esubalewkunta59@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Education

Bahir Dar University | [BDU](#)
BSC in Software Engineering

June 2021 – June 2025
Bahir Dar, Ethiopia

- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Probability & Statistics, Data Structures & Algorithms, Big Data Analytics, Distributed Systems, Database Systems, Web and Mobile Development.

Experiences

Zemen Bank S.C. | [Website](#)
IT Officer II

August 2025 – March 2026
Addis Ababa, Ethiopia

- Engineered competency system for 1,800+ employees automating role-based recs, saving HR 15 manual hours weekly.
- Slashed assessment turnaround time by 60% using remote monitoring tools, enabling same-day feedback for 200+ trainees.
- Integrated career tracking with performance analytics to drive data-based promotions, increasing internal fill rate by 25%

Agape Mobility Ethiopia | [Website](#)
Volunteer Mobile Developer

June 2024 – June 2025
Addis Ababa, Ethiopia

- Developed offline-first app for registration in zero-connectivity zones, enabling registration without internet.
- Onboarded 1,000+ recipients onto system, eliminating paper handling and cutting registration time by 70% per person.
- Streamlined aid distribution by syncing data after connectivity restored, reducing dispatch delays to 4 hours.

Macrobian Technologies | [Website](#)
Software Developer Intern

May 2024 – October 2024
Addis Ababa, Ethiopia

- Built accessible e-learning platform for 500+ remote & disabled students, enabling equitable access where none existed before.
- Integrated live sessions, recorded lectures, and interactive Q&A, boosting student engagement by 40% across all modules.
- Designed structured course pathways that enabled self-paced learning for users with limited or intermittent connectivity.

n8n Automation Projects

Lead Intelligence Pipeline | [GitHub](#) | *n8n, Apollo, Google News, Groq, HubSpot, Slack, Gmail*

- Built 24-node n8n pipeline processing every inbound strategy session lead end-to-end in under 90 seconds.
- Designed 6-dimension AI scoring model against defined ICP criteria, achieving 8.9/10 accuracy on first live test.
- Automated HubSpot CRM entry, tiered Slack alerts, and human email approval flow, eliminating 45 minutes of manual work per lead.

Competitor Intelligence Monitor | [GitHub](#) | *n8n, Groq (LLaMA 3), Google News, Slack, Supabase*

- Built n8n pipeline that monitors competitor activity across news sources on a daily schedule with zero manual input.
- Wired AI summarisation layer that extracts key signals and ranks them by relevance before delivering to Slack.
- Stored every briefing in Supabase, building a searchable competitive intelligence history over time.

Live Trend to Content Pipeline | [GitHub](#) | *n8n, Groq (LLaMA 3), Google Trends, Telegram Bot, Slack*

- Built n8n workflow that monitors trending topics in real time and scores each one against brand relevance criteria.
- Generated ready-to-publish content drafts from each detected trend using a single AI call per topic.
- Routed every draft through a Telegram approval gate, blocking all publishing without explicit admin sign-off.

AuraEngine: Omni-Channel Autonomous Content Factory | [GitHub](#) | *n8n, Telegram Bot API, Groq (LLaMA 3), Supabase*

- Architected 3-agent AI pipeline that ingests a product URL and generates platform-specific scripts for YouTube and TikTok.
- Built human-in-the-loop approval gate via n8n Wait Node and Telegram keyboard, blocking all posts without admin sign-off.
- Wired zero-cost media pipeline using Pollinations.ai and ElevenLabs with full Supabase audit logging on every run.

Skills

- **Automation & Workflows (n8n):** Webhooks, error handling, HTTP requests, code nodes, sub-workflows, retry logic
- **AI & LLM Integration:** Groq, OpenAI, Claude, prompt engineering, AI agents, structured JSON output
- **APIs & Integrations:** HubSpot, Slack API, Gmail, Apollo.io, GoHighLevel, Shopify, Supabase, REST APIs
- **Software Development:** TypeScript, JavaScript, Python, Node.js, React, PostgreSQL, Docker, Git
- **Soft Skills:** ownership, fast execution, problem-solving, remote collaboration, technical communication

Achievements

- **3rd Best Final Year Project (out of 46)** - Bahir Dar University (2025) - [Certificate](#)
- **Python Trainer:** Trained 50+ students in Python & ML basics (6 weeks, Bahir Dar University) - [Certificate](#)
- **Top 0.2% nationally (702nd of 340,000+)** in the Ethiopian University Entrance Examination - [Certificate](#)
